HCL Software

- Review the fulfillment options, such as Regions
Click Continue to Launch

The screenshot shows the HCL AppScan configuration interface. At the top, there's a header with 'HCL AppScan' and 'HCL AppScan Standard'. A red box highlights a 'Continue to Launch' button. Below the header, there are navigation links: '< Product Detail', 'Subscribe', and 'Configure'. The main heading is 'Configure this software'. A sub-heading says 'Choose a fulfillment option and software version to launch this software.' There are three dropdown menus: 'Fulfillment option' (64-bit (x86) Amazon Machine Image (AMI)), 'Software version' (10.6.0 (Nov 22, 2024)), and 'Region' (US East (N. Virginia)). Below these, there's a note: 'Use of Local Zones or WaveLength infrastructure deployment may alter your final pricing.' Further down, there are fields for 'Ami Id: ami-0227babdb481d91fa', 'Ami Alias: /aws/service/marketplace/prod-qpswkpw3x7yy/10.6.0' with a 'Learn More' link and a 'New' badge, 'Product Code: 38tdgmodjiwokzkdwtw1dq6fo', and 'Release notes (updated November 22, 2024)'. On the right, there's a 'Pricing information' box with a disclaimer: 'This is an estimate of typical software and infrastructure costs based on your configuration. Your actual charges for each statement period may differ from this estimate.' Below that, it shows 'Infrastructure Pricing' with 'EC2: 1 * c5.xlarge' and 'Monthly Estimate: \$255.00/month'.

- You can choose to deploy from website (this page) or from your EC2 console.
Please select your desired EC2 instance type, VPC settings and subnet settings.
Consult with your administrator if you are unsure what to choose.

The screenshot shows the HCL AppScan configuration interface for deployment options. At the top, there's a header with 'HCL AppScan' and 'HCL AppScan Standard'. Below the header, there's a 'Choose Action' section with a dropdown menu set to 'Launch from Website' and a note: 'Choose this action to launch from this website'. Below that, there's an 'EC2 Instance Type' section with a dropdown menu set to 't3a.xlarge' and a note: 'Memory: 16 GiB, CPU: 4 virtual cores, Storage: EBS Only, Network Performance: Up to 5 Gigabit Ethernet'. Below that, there's a 'VPC Settings' section with a dropdown menu set to 'vpc-0-...' and a note: '* indicates a default vpc'. Below that, there's a 'Subnet Settings' section with a dropdown menu set to 'subnet-07-...:2619 (us-east-1a)' and a note: 'IPv4 CIDR block: 192.168.0.0/25'. There are also links to 'Create a VPC in EC2' and 'Create a subnet in EC2'.

HCL Software

6. Select the relevant security group and Key Pair.
You need a key pair to obtain the instance administrator password
Then click Launch

Security Group Settings

A security group acts as a firewall that controls the traffic allowed to reach one or more instances. You can create a new security group based on seller-recommended settings or choose one of your existing groups. [Learn more](#)

[Create New Based On Seller Settings](#)

Key Pair Settings

To ensure that no other person has access to your software, the software installs on an EC2 instance with an EC2 key pair that you created.

[Create a key pair in EC2](#)

(Ensure you are in the region you wish to launch your software)

[Launch](#)

7. After launching, you can click (View Launch Configuration Details)

HCL AppScan

HCL AppScan Standard

Congratulations! An instance of this software is successfully deployed on EC2!

AMI ID: ami-0227babdb481d91fa [\(View Launch Configuration Details\)](#)

You can view this instance on [EC2 Console](#). You can also view all instances on [Your Software](#). Software and AWS hourly usage fees apply when the instance is running and will appear on your monthly bill.

You can launch this configuration again below or go to the [configuration page](#) to start a new one.

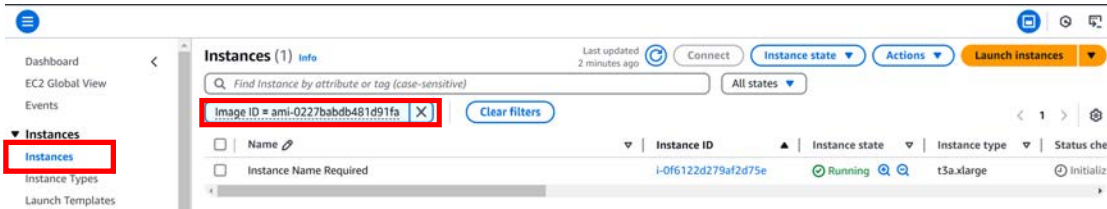

Software Installation Details

AMI ID:	ami-0227babdb481d91fa
Product:	HCL AppScan Standard
Version:	10.6.0

HCL Software

8. You can use the AMI to search the newly created instance.
You can rename the instance for better management in the future.

9. Once the status check passed Right-Click, Security, Get Windows Password

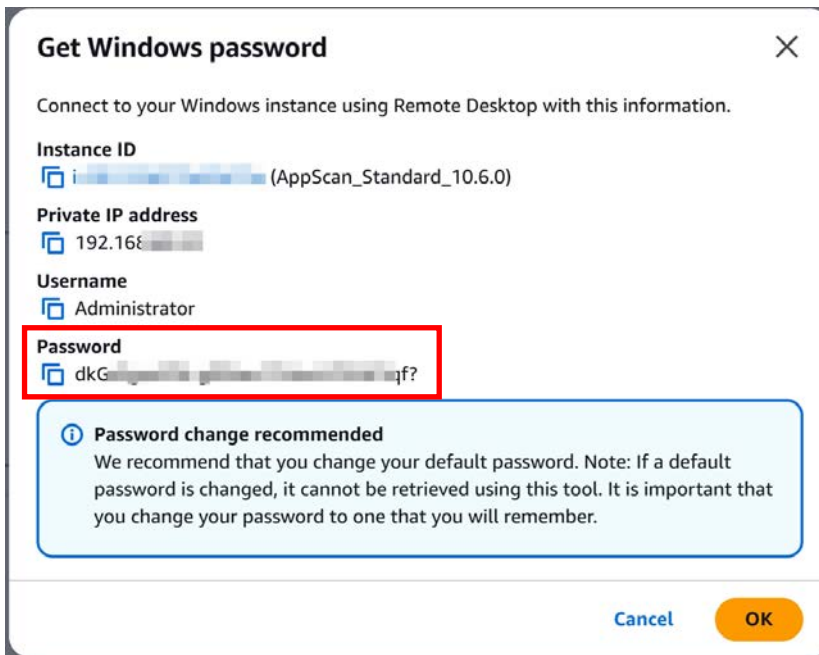

10. Upload the private key you used to pair with this instance.

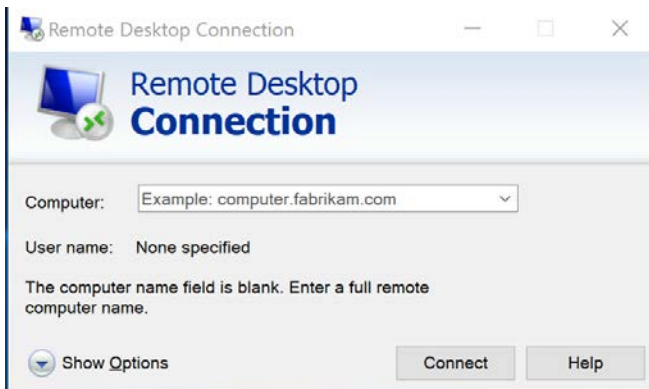

HCL Software

11. This is your windows password, please change password after login.

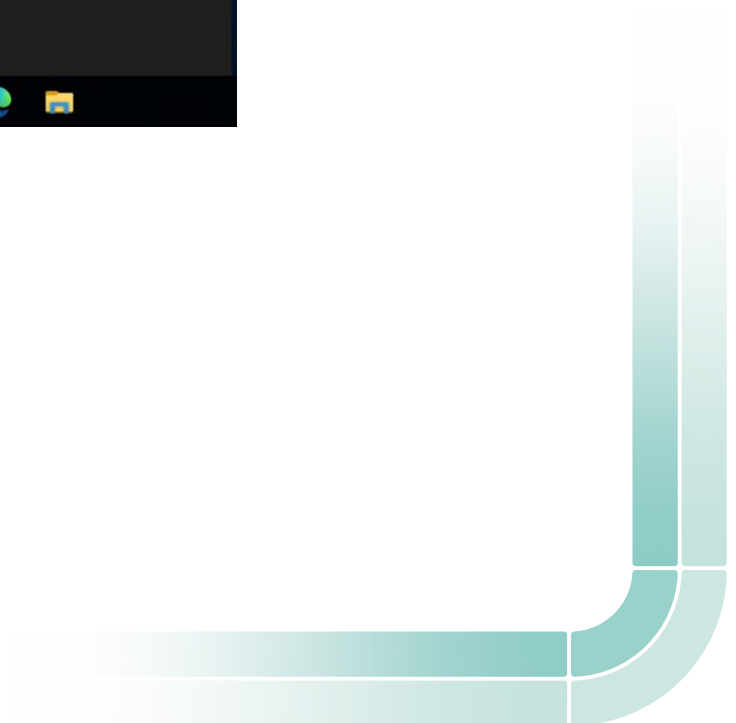

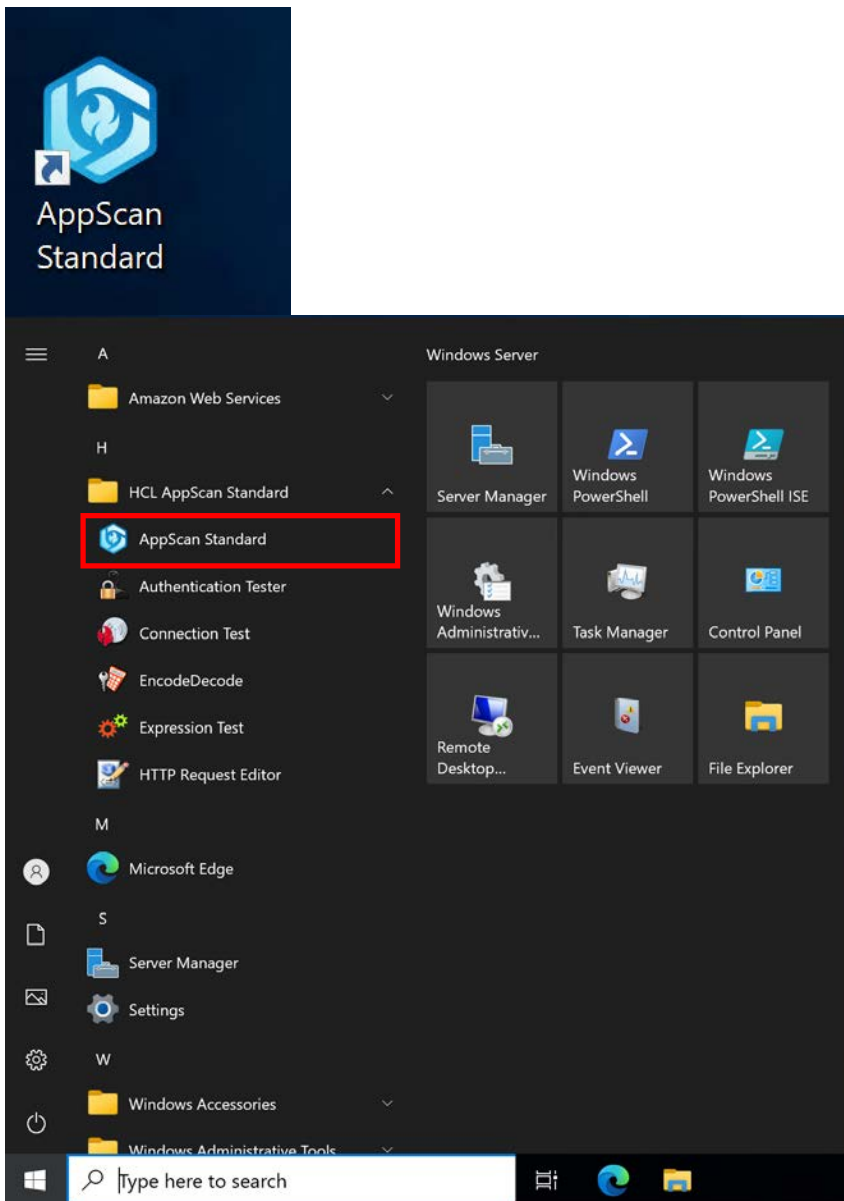

12. Login to your HCL AppScan Window Machine using Microsoft Remote Desktop.

HCLSoftware

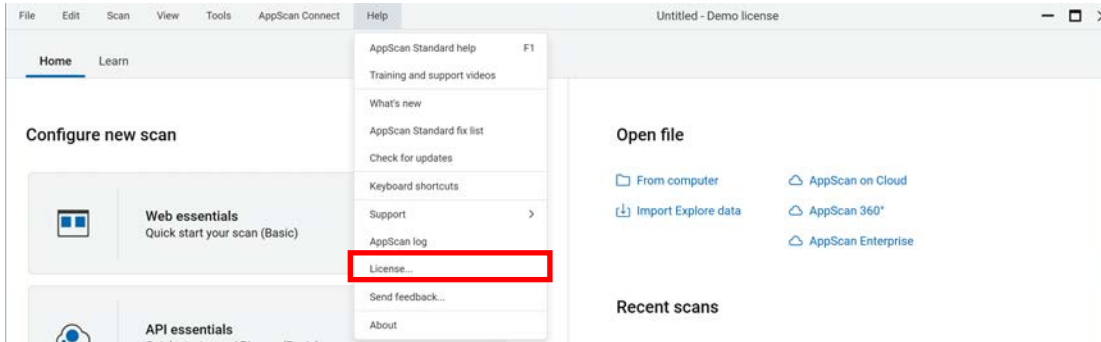

13. After logging in to the instance, you will find the HCL AppScan logo on desktop or in the start menu.

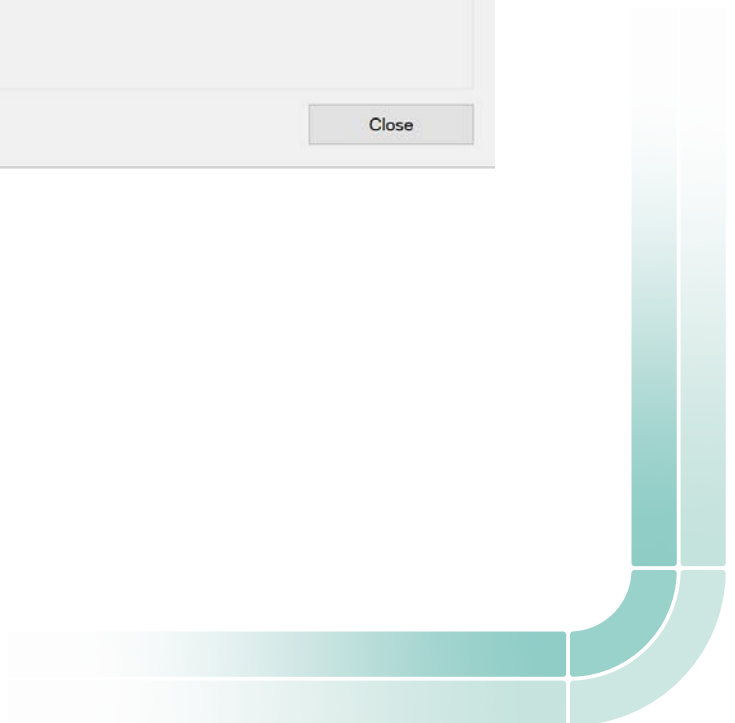

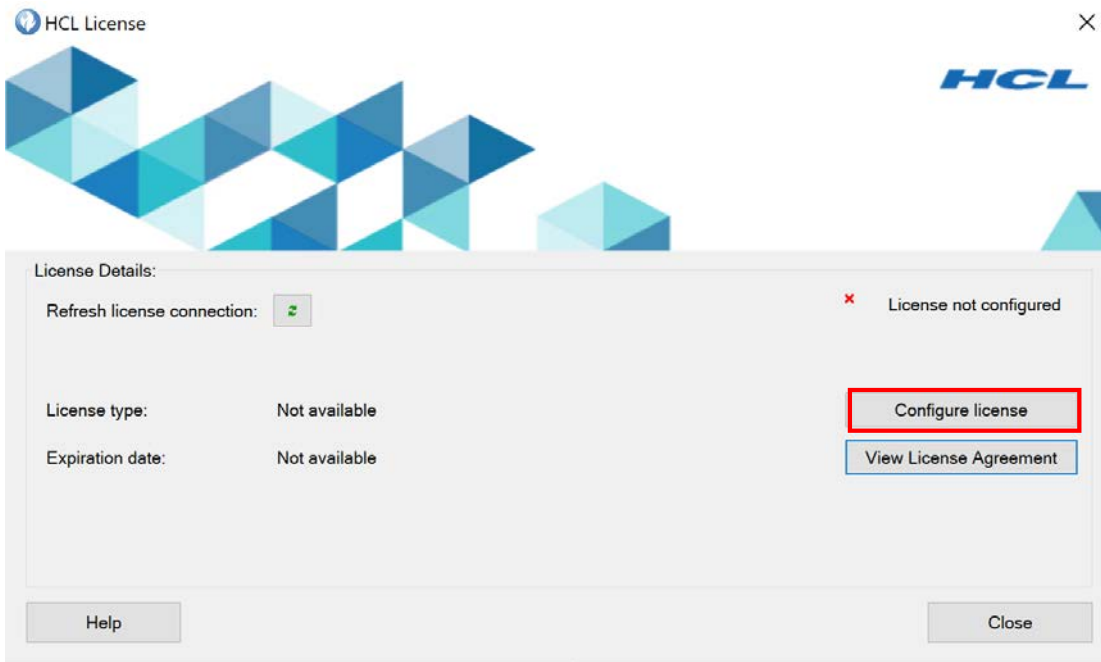

HCL Software

14. You will need a license from HCL Software to operate HCL AppScan Standard at full function.

Click on Help > License

15. Click configure your license

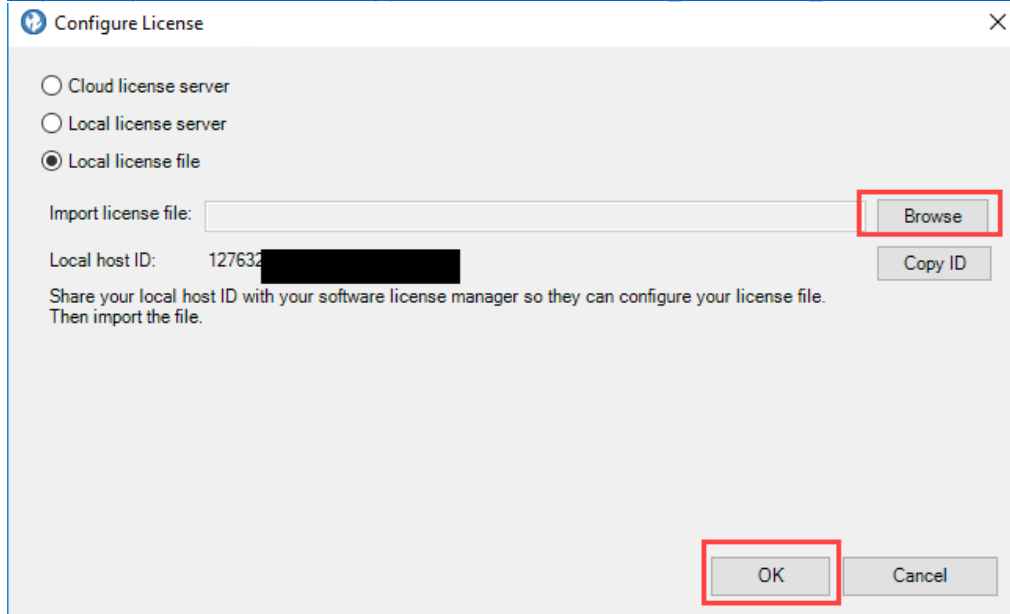

HCL Software

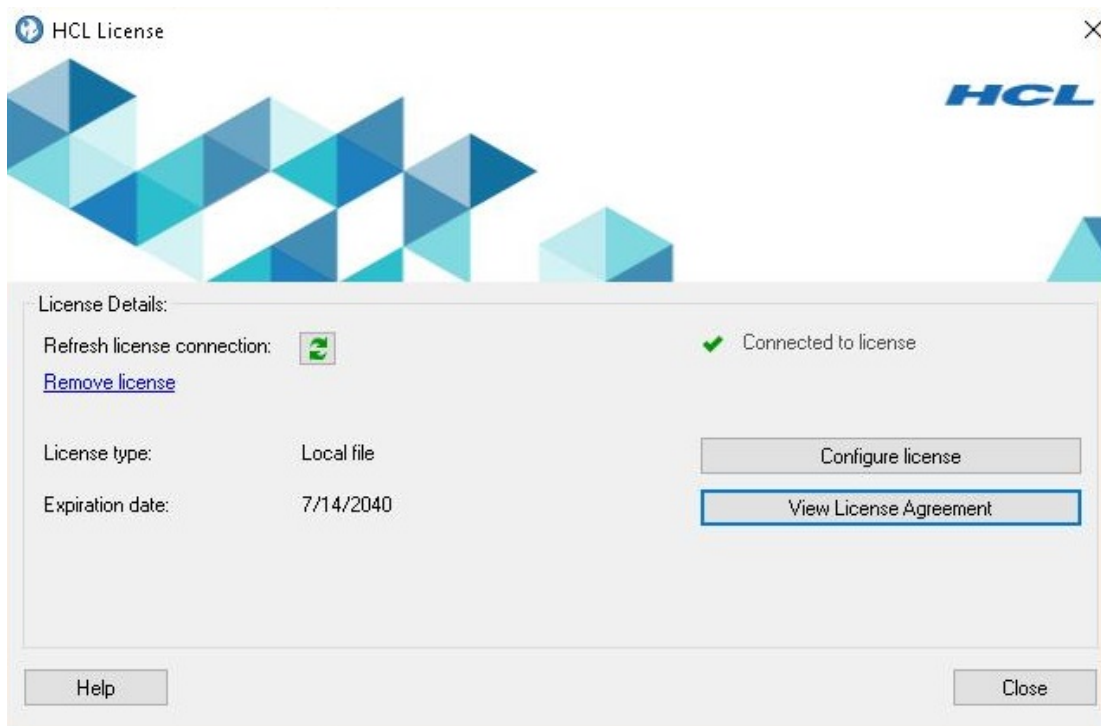

16. Import your license.

Visit setup a Node-Lock license:

https://help.hcl-software.com/appscan/Standard/10.6.0/t_LicenseHCL_NodeLocked.html

17. You have now successfully setup your Node-Lock license.

About HCL AppScan

HCL AppScan is a scalable suite of security testing platforms and tools including SAST, DAST, IAST, and SCA, available as SaaS on cloud, or self-managed cloud-native and on-prem. HCL AppScan solutions detect pervasive application security vulnerabilities during development and facilitate remediation before the software is deployed. Developer-focused advisories and language-specific code samples empower developers to remediate vulnerabilities and instill secure coding practices. Comprehensive management capabilities enable security professionals, developers, DevOps, and compliance officers to continuously monitor the security posture of their application and maintain compliance with regulatory requirements.
